WO 2005/082912 PCT/US2005/004097

WHAT IS CLAIMED IS:

1. A 2-part adhesive formulation comprising, in a first part, water, a surfactant, and a protected alkylborane complex and, in a second part, an acrylic monomer and a trialkylborane-displacing initiator.

- 2. The formulation of Claim 1 wherein protected alkylborane complex is a trialkylborane-organonitrogen complex the second part further includes an acrylic polymer as a thixotropic agent.
- 3. The formulation of Claim 2 wherein the thixotropic agent is a poly(methyl methacrylate).
- 4. The formulation of Claim 3 wherein the surfactant is a polyvinyl pyrrolidone, a polyetheramine, a polyethylene glycol, a polyethylene glycol-polypropylene glycol copolymer, a polyacrylamide, a hydroxycellulose, a polyvinyl alcohol, a polyacrylic acid salt, or a polymethacrylic acid salt, or a combination thereof.
- 5. The formulation of Claim 3 wherein the second part of the formulation includes an acrylic monomer selected from the group consisting of hydroxyethyl acrylate, hydroxybutyl methacrylate, and methyl methacrylate; and a trialkylborane initiator selected from the group consisting of acrylic acid and methacrylic acid.
- 6. The formulation of Claim 5 wherein the acrylic monomer includes methyl methacrylate and the trialkylborane initiator includes acrylic acid.
- 7. A 2-part adhesive formulation comprising, in a first part, water, a surfactant, and a trialkylborane-organonitrogen complex and, in a second part, methyl methacrylate, a thixotropic agent, and a trialkylborane-displacing initiator selected from the group consisting of acrylic acid, methacrylic acid, and a 2-hydroxyalkyl acrylate.
- 8. The 2-part adhesive of Claim 7, which includes in either the first or second part or both a pigment, a dye, a filler, or an antioxidant, or a combination thereof.

WO 2005/082912 PCT/US2005/004097

9. A composition comprising water, a surfactant, an acrylic monomer, a trialkylborane-displacing initiator, and a thixotropic agent.

- 10. The composition of Claim 9 which further includes a protected alkylborane complex.
- 11. The composition of Claim 10 wherein the protected alkylborane complex is a trialkylborane-organonitrogen complex.
- 12. The composition of Claim 10 which forms a cured adhesive.
- 13. A method comprising the step of contacting a surfactant-stabilized aqueous dispersion of a trialkylborane-organonitrogen complex with a acrylic monomer and a trialkylborane-displacing initiator to form a curing acrylic-based adhesive; and 2) applying the curing adhesive to a low surface energy substrate.
- 14. The method of Claim 13 wherein steps 1) and 2) are carried out concomitantly.
- 15. The method of Claim 13 wherein the low surface energy substrate is selected from the group consisting of polyethylenes, polypropylenes, ethylene-α-olefin copolymers, hydrogenated polyisoprenes, polyvinylidene fluorides, polytetrafluoroethylenes, polyesters, polyamides, polyacetals, and polystyrenes.
- 16. The method of Claim 13 wherein the low surface energy substrate is an isotactic polypropylene.
